

INVENTION OF THE CENTURY IN THE TATTOO REMOVAL INDUSTRY

SWISS BEAUTY MAGNETIC
INTERNATIONAL

MAGNETIC TATTOO REMOVAL BY LINDA PARADIS

THE INVENTION OF THE CENTURY

**Linda
Paradis**

**Inventor of the Noninvasive Magnetic Needles
CEO & Founder of Linda Paradis Group - USA**

About the inventor

Mrs. Linda Paradis is an inventor, Clinical researcher, and founder of Linda Paradis Group

She is the first international leader in the development and launching of the most safe and non-invasive technique in the tattoo removal industry

Linda Line Paradis is the CEO and founder of Linda Paradis Group, a renowned clinical practitioner, expert, speaker, and international examiner in Non-invasive aesthetics treatments since 1996

In 2004, she obtained the Award of "Oscar of Best Innovation" at the "Mondial Beauté" in Paris for the charter for her work's quality and ongoing importance as a recognised leader in the tattoo removal industry..

She owns two worldwide patents for the Non-invasive Needles and the Magnetic Needle, given by

"The United States Patent and Trademark Office " and the European "National institute of industrial property"

As a reputed and assiduous leader within the Beauty industry, Linda Paradis explores the world to share her findings and innovations with Beauty industry professionals, educators, and physicians

She has developed the technique of Magnetic Tattoo Removal, which guarantees exceptional results without the use of laser or risky surgeries There will be no scars regardless of the number of sessions

Her Technique is being practised in 40+ countries worldwide and became the first choice of top ranked by professionals

WHAT IS THE EFFICIENCY OF THE MAGNETIC TATTOO REMOVAL TECHNIQUE?

- Magnetic Tattoo Removal is effective on all kind of pigments even the ones without heavy metals.
- Magnetic Tattoo Removal is effective on damaged skin that got hypertrophic scars from previous removal sessions by other Invasive Techniques.
- Magnetic tattoo Removal is effective on all phenotype skins, as well as very dark skin.
- Magnetic Tattoo Removal is effective on mucus Lips and lip liners.
- Magnetic Tattoo Removal is effective on Tattoo Pigments of all colors and even on Titanium(white), Blue or any other.

The Non-invasive MAGNETIC TATTOO REMOVAL technique is a cascade of actions linked to each other without breaking the skin.

- A Mechanical & Physical action with the Magnetic Needles 52, 88 &132
- A strong Ultrasonic and Ultrasound action with the Magnetic Needles 52, 88 &132
- A Thermal action with the Magnetic Needles 52, 88 &132
- A powerful 300 Gauss Magnetic action with the Magnetic Needles 52, 88 &132
- Magnetic & Chemical action with the E-Dermis Ink Extractor solution

WORLDWIDE PATENTS

Revolutionizing Tattoo Removal: The Advantages of Using High-Power 300 Gauss Magnetic Needles with E-Dermis Ink Extractor Solution

The use of high-power 300 Gauss magnetic needles ensures maximum efficacy in the tattoo removal process, setting our technology apart from conventional methods.

Our magnetic needles, available in configurations of 52, 88, and 132, are designed to work in synergy with the E-Dermis Ink Extractor solution for optimal results.

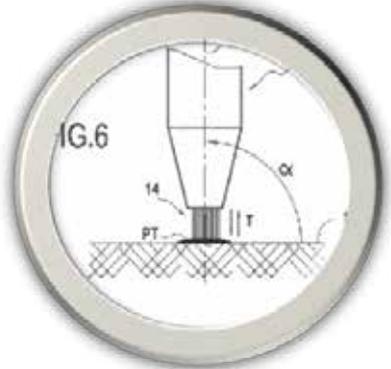

The potent 300 Gauss magnetic action enhances the molecular interaction between the skin and the Ink Extractor solution, leading to a more effective breakdown of dermal tattoo ink molecules.

These magnetic needles not only augment the chemical action but also contribute to the mechanical and physical aspects of the removal process, offering a multi-faceted approach to tattoo and scar removal.

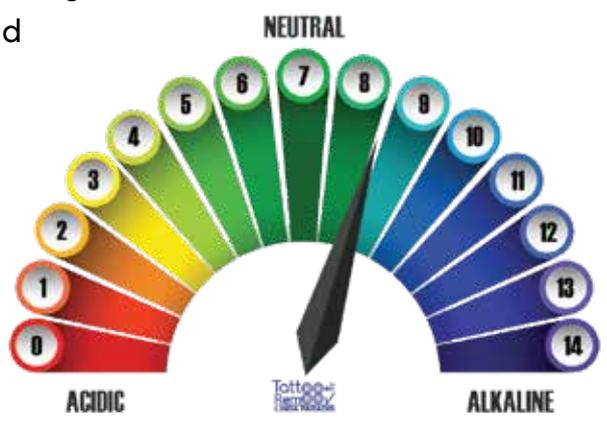

Engineered for precision and safety, our high-power 300 Gauss magnetic needles are an integral component in our patented, non-invasive procedure, aligning with our commitment to deliver effective and pain-free treatments.

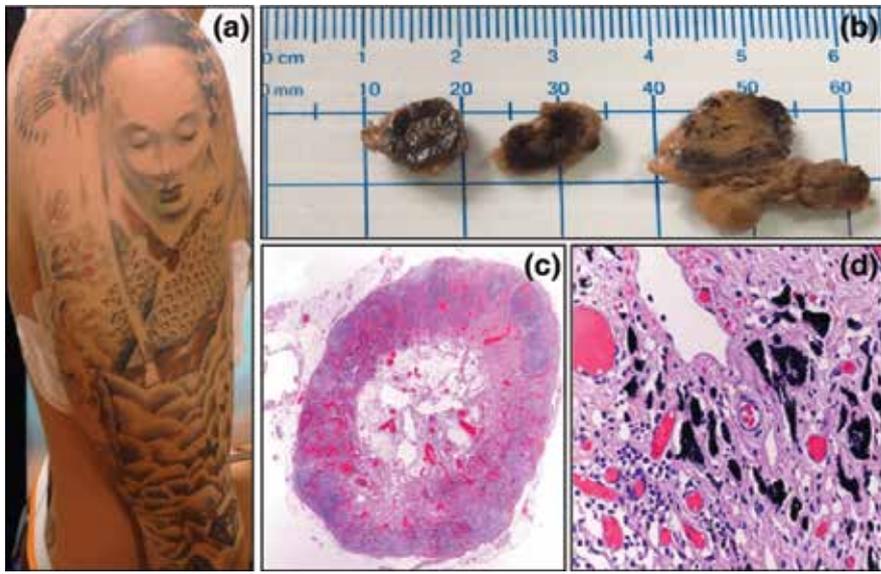

E-Dermis Ink Extractor Solution; A Safe, Effective and FDA Regulated solution for Tattoo Removal Procedures.

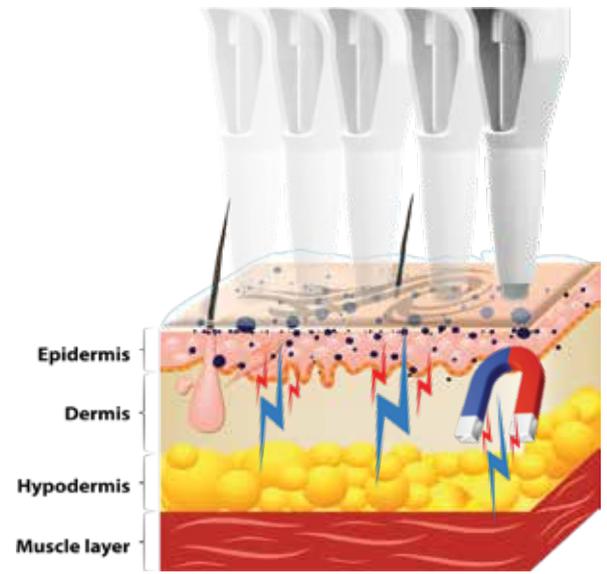

- ⚡ The E-Dermis Ink Extractor Solution is formulated with 01 Water, ensuring a base that is both stable and biocompatible for safe skin applications.
- ⚡ Comprised of ingredients commonly used in the food industry, our solution prioritizes non-toxic components that are safe for human consumption and skin contact.
- ⚡ With a pH level of 8.5, the E-Dermis Ink Extractor is designed to maintain skin integrity while optimizing the efficacy of the tattoo removal process.
- ⚡ Our formulation also incorporates ingredients that are widely recognized and accepted in the cosmetic industry, underscoring our commitment to quality and safety.
- ⚡ The E-Dermis Ink Extractor Solution is an FDA-Regulated cosmetic product, reinforcing its credibility and adherence to stringent safety and efficacy standards

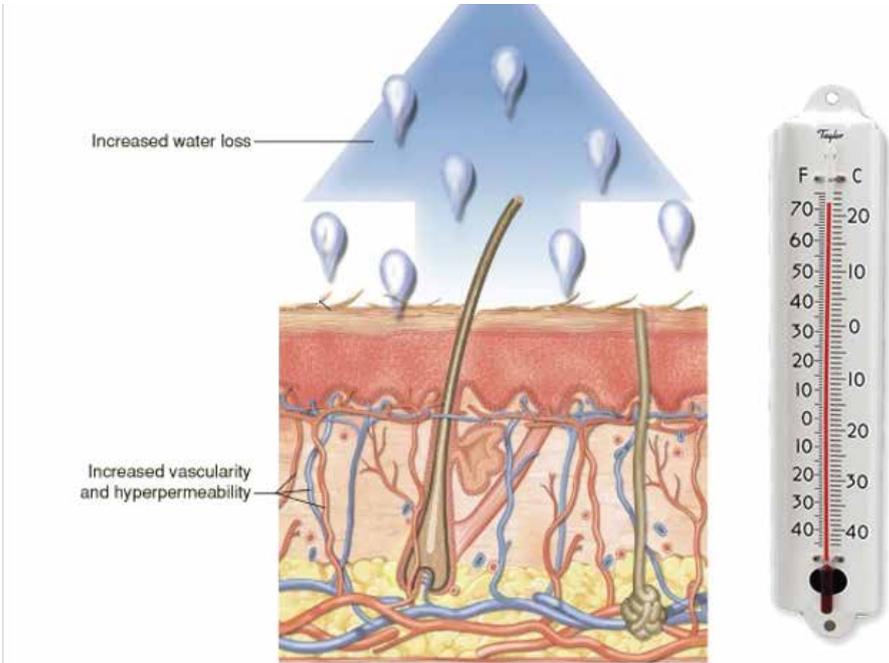

The Dermis is totally full of tattoo ink

Physical & Mecanical actions

Thermal action

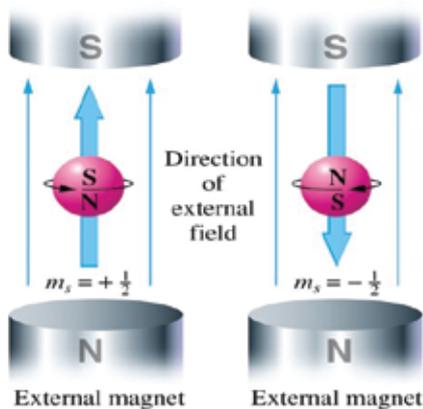

Ultrasound & Ultrasonic action

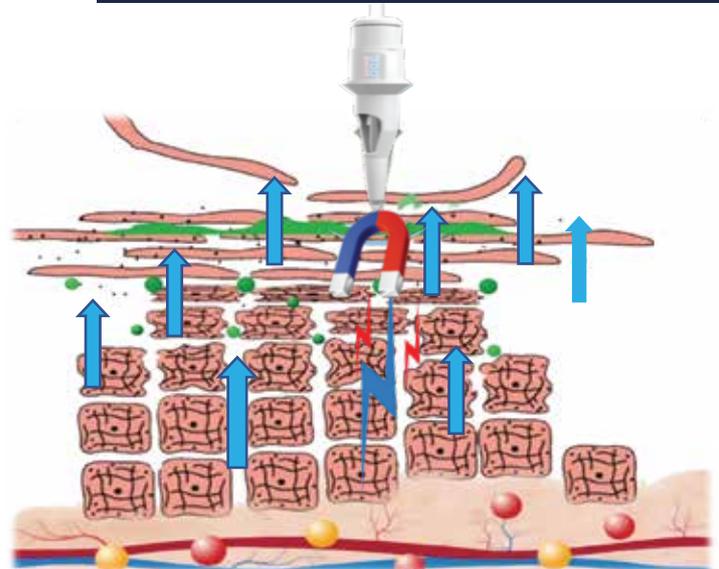

Electron Spin and Magnetism

There is an additional quantum number, and one that is very important!

- Spin Quantum Number (m_s)
- Electrons can have a spin of $+1/2$ or $-1/2$
- Since electrons are charged particles, as they move (spin, for example), they create magnetic fields.

Chemical & Magnetic action

INK EXTRACTION

CLINICAL RESEARCH for MAGNETIC TATTOO REMOVAL; on the Cosmetic tattoos, tested on five hundred “Women” in the world from 2016 to 2023.

Wolfgang Bäumler (University of Regensburg)

Final Draft

Lasers Breaks Tattoo Pigments Molecules that are removed via Lymphatic System

3.3.9 Risks of the laser treatment of tattoos

The absorption of the light pulses in the tattoo pigments is the first and important step to tattoo removal using Q-switched lasers. The absorbed energy is converted to heat (photothermal effect) or breaks chemical bonds inside the pigment (photochemical effects). After the ultrashort heating of the pigment surface shock waves are induced leading to a mechanical destruction of the pigments. As a response, a multitude of mechanisms may occur at the same time. Large aggregates and agglomerates break down into smaller crystals. Particles pulverize and form a solution of pigment molecules. Molecules can break up, resulting in decomposition products or molecular structure change. Due to fragmentation of the tattoo pigments, small pigment particles, unknown decomposition products and newly generated chemical compounds may be then removed from the skin via blood vessels or the lymphatic system. On the other hand, the pigments remaining in the skin may exhibit different chemical characteristics as compared to nonirradiated pigments. Thus, there might be again a reaction of the immune system. Moreover, it was shown that carcinogenic amines are generated by a laser-induced cleavage of azo dyes⁷⁴.

3.3.9.1 Allergy

As described above the laser treatment induce old/new chemical compounds in the skin leading to allergic reactions.

IS MAGNETIC TATTOO REMOVAL THE BEST TECHNIQUE IN THE WORLD?

100% No risks of scars or fibrosis

Effective on all Phenotypes of Skin

Effective on all types of pigments

Effective in all seasons

Effective on all types of tattoos PMU-Scalp-Body

Effective on Microblading Lips liner and the Muccus lips

Effective absolutely on all Tattoo pigments colours

No need for any numbing

No contain any carcinogenic ingerdients

No collagen induction

It's not Laser, Neither an Acid nor Saline & no High Alkaline

Fast Healing (3 weeks)-Comparatively Less sessions

A new tattoo or a new PMU can be applied quickly,after last removal session.

MAGNETIC TATTOO REMOVAL

ALL LASERS

ACID - TCA SALINE HIGHT ALKALINE

- ✓ Noninvasive Technique. Safe
- ✓ Less pain.
- ✓ No need numbing.
- ✓ No risk, no scar, no crust from the product, No hair loss, light scabbing.
- ✓ Removes all colors Red, Green, Yellow, Blue, White...
- ✓ Removes all kind of pigments, organic, inorganic, mineral... Suitable for all phenotypes skin.
- ✓ Fast treatment and less sessions.
- ✓ The Gap between sessions is 3-4 weeks max.
- ✓ E-Dermis /Tattoo Remoov solution is Made in the USA- FDA Regulated. Cosmetic backery and food industry ingredients.
- ✓ 99 % Guaranteed success.
- ✓ Healthy skin, after several treatments it's possible to make new cosmetic or body tattoo.
- ✓ After each session the healing process is perfect.
- ✓ Magnetic tattoo removal technique breaks tattoo pigments molecules and extract it out from the deep dermis (Skin).

- ✗ Laser rays damage the dermis layer.
- ✗ Extremely painful if no numbing.
- ✗ Numbing obligatory.
- ✗ High risk for burning, hypertrophic scarring, keloid, hair loss.
- ✗ Does not remove all colors.
- ✗ Does not remove all kind of pigments.
- ✗ Not suitable for dark skin.
- ✗ May take 20 to 30 sessions on body tattoos . Often cannot follow sessions because the the damage of the skin.
- ✗ 8 to 12 weeks at least between each session.
- ✗ Change the skin texture and the tattoo eyebrows become red / yellow / orange color. The Lips become Greem / Grey / Purple and very damaged.
- ✗ Not safe specially around eyes, also ink molecules are liberate in blood via, leading skin to allergic reactions and hypersensitivity reactions.
- ✗ 60 % Result - FADER with High risk for burning, allergy, scars, hair loss ...
- ✗ Damage epidermis and dermis by destroying the skin's fibroblast and collagen.
- ✗ Leave scars, burning or scarring or keloid
- ✗ Due to fragmentation of the tattoo pigments, small pigment particles, unknown decomposition of products and newly generated chemical compounds may be then removed from the skin via blood vessels or the lymphatic system.

- ✗ Invasive Technique
- ✗ Extremely painful if no numbing
- ✗ Numbing obligatory
- ✗ High risk for burning, hypertrophic and atrophic scarring, hair loss, keloid.
- ✗ Does not remove all colors.
- ✗ Does not remove all kind of pigments.
- ✗ Not suitable for all skin colors
- ✗ Acid / Saline are only FADERS . Also, with the repetition of the sessions the skin may be highly damaged.
- ✗ 8 to 12 weeks at least between each session.
- ✗ Not safe at all, leading skin to allergic reactions and hypersensitivity reactions.
- ✗ Saline and Acid PH is 2.5 and high Alkaline solutions PH is 12.
- ✗ 20% Guaranteed success, High risk for burning, scars, hair loss, allergy...
- ✗ Dermis is very damaged, cannot use any kind of Ink for new Tattoo either cosmetic or body.
- ✗ Leave scars, burning or scarring or keloid
- ✗ Cannot follow the treatments.
- ✗ Chemical reaction by fading the tattoo color or bleaching the skin.

Effective in all seasons

Effective on all types of pigments
Organic, inorganic, synthetic and mineral

Effective on all Phenotypes of Skin
Asian - Medium - Fair - Dark

Effective on all types of tattoos

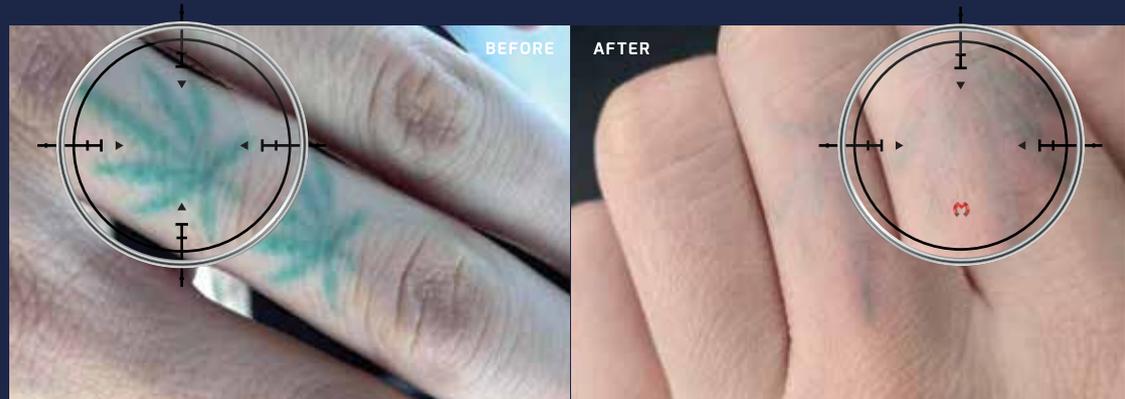

Scalp pigmentation - Body tattoos - PMU
Microblading - Full Lips - Eyeliners

Effective on all Tattoo pigments colours
White - Blue - Yellow - Orange
Green - Black - Purple - Brown - Red

Who is the inventor of the Non-Invasive Magnetic Needles, and developer of the Magnetic tattoo removal technique?

Mrs. Linda Line Paradis is an inventor and Developer of the miraculous Technique of **Magnetic Tattoo Removal**. She is the first international leader in the development and launch of the safest and non-invasive technique in the tattoo removal industry.

Mrs. Linda Line Paradis has secured two patents worldwide for the needles that she has invented.

Those Patents are as follows:

• NON-INVASIVE NEEDLES

The patent application was submitted in 2017, and the patent was granted in 2020 by the "United States Patent and Trademark Office."

• MAGNETIC NEEDLES

Due to continuous Research and development to bring this technology to highest level of Safety, these Non-Invasive needles has been evolved to Non-Invasive Magnetic Needles. This achievement has also received a Patent from United States Patent and Trademark office."

The recognition of these patents by authorities worldwide underscores the innovative nature of her contributions and the unique advantages our technique holds.

Below are the details of other worldwide Patents to this invention.

China, Hong Kong, India, Vietnam, Europe, Russia, Japan, UK, Turkey...

Are these magnetic needles sterilized and intended for one-time use only?

Non-Invasive Magnetic needles invented by Mrs. Linda Paradis and produced solely by Linda Paradis Group have undergone sterilization process to ensure the safety standards. All the needles are for single use and to be disposed of under proper hygienic conditions.

The technicians have been educated and instructed to follow this protocol.

On the needle box, it is specified the then needles are sterilized and for single use only, it is under the responsibility of the technician to respect the instructions use.

Is the E-Dermis Ink Extractor Composition a safe solution?

- E-Dermis/Tattoo Remoov solution was branded in the USA with another name.
- It has been used worldwide for more than twenty years, with no complications. Over time, the formulation has been enhanced by a renowned laboratory located in New York.

What is the other use for the E-Dermis solution and the Non-invasive Magnetic Needles?

- Detox lips - Detox Eyebrows
- Snow lips: Rejuvenating and enlightening
- Neutralizing Lips

What is difference between 52/88/132 Magnetic Needles?

- EYEBROWS & LIPS REMOVAL: 88 MAGNETIC
- EYELINER TATTOO REMOVAL: 52 MAGNETIC
- SNOW LIPS - DETOX LIPS: 132 MAGNETIC
- DETOX. BROWS - BOOST BROWS: 132 MAGNETIC

What are the ingredients of the E-Dermis Ink Extractor solution?

Distilled water

Propanol: COSMETIC INDUSTRY

This alcohol is primarily used as a preservative in cosmetic and personal care products.

Magnesium Oxide: COSMETIC INDUSTRY

It is a mineral, that is often added to cosmetic and personal care products to control the viscosity and bulk up the product.

Centella asiatica Extract.: COSMETIC & FOOD INDUSTRY

- Antibacterial Activity
- Anti-aging.
- Anti-Inflammatory effect

Methyl p-Hydroxybenzoate: FOOD & COSMETIC INDUSTRY

Preservative for cosmetic, drugs Antibacterial Activity

Zinc Oxide: COSMETIC INDUSTRY

White matt pigment, very useful as white basic for make-up products.

Pentylene Glycol: COSMETIC INDUSTRY

It is used in cosmetics and beauty products.

As an emulsion stabilizer, humectant, solvent, and a broad-spectrum antimicrobial. It improves texture of the product.

TEA Benzoate: COSMETIC INDUSTRY

Triethanolamine (also known as TEA) is used in cosmetics as a pH balancer and emulsion stabilizer.

Calcium Thioglycolate: COSMETIC INDUSTRY

It is excellent in personal care product applications including toothpastes, creams and lotions, cosmetics, and powders. In makeup, it is used as a pigment, pigment extender and prolonger.

Do we need the use of anesthesia for numbing skin?

We do not use any numbing, because the technique is Non-Invasive.

Only the technique Numbing with pressure fingers,

Why there are not many photos of body Tattoo before /After?

Magnetic Tattoo Removal for Body Tattoos Technique was launched just two years ago and further to remove Body Tattoos it takes longer sessions. That is why there is scarcity of Before and After images. However, in the case of Scalp, Eyebrows, Eyeliner, Lips, and facial ethnic tattoos, a substantial collection of before-and-after photos and videos is available.

Is Magnetic Tattoo Removal technique effective on all Tattoo inks and pigments (Organic, inorganic, vegetal, mineral)?

The Magnetic Tattoo Removal technique demonstrates effectiveness across various tattoo inks and pigments for example: Organic, inorganic, vegetal, mineral.

Is Magnetic Tattoo Removal technique effective on all Phenotype skin?

The Magnetic Tattoo Removal technique is effective on all Phenotype skin such as Asian, Medium, Fair and Dark.

Is Magnetic Tattoo Removal technique effective on all colors?

The Magnetic Tattoo Removal technique exhibits effectiveness on all shades and colors of tattoos. Even White and green that are the nightmare of all kinds of lasers.

Are there any risks for the skin? Does Magnetic Tattoo removal cause any scars on skin?

The sole potential risk is a slow healing process resulting from failure to adhere to the prescribed post care Treatment protocol.

Is Magnetic Tattoo removal effective on Microblading?

Yes, Magnetic Tattoo removal effectively remove Microblading also, and any kind of permanent make-up. Magnetic Tattoo removal is a Gold Standard for cosmetic tattoo removal.

Can I get a new cosmetic Tattoo after the few sessions of Magnetic Tattoo Removal?

Once the skin has fully healed following a few sessions of magnetic tattoo removal, it is possible to proceed with getting a new cosmetic tattoo. Because the epidermis and the dermis are not damaged.

Can I perform Magnetic Tattoo Removal on the mucus lips?

Magnetic Tattoo Removal is the only Technique that can be performed safely in this Area. Mucous membranes are thin and sensitive tissues that line various cavities in the body, including the inside of the lips.

Can I perform Magnetic Tattoo Removal on Scalp pigmentation?

Yes, Magnetic Tattoo Removal can be performed on Scalp pigmentation also, even on FUE and FUT scars with scalp pigmentation.

Can I perform Magnetic Tattoo Removal on skin with healed old scars from previous acid, laser, or saline tattoo removal treatments?

The Magnetic Tattoo Removal Technique proficiently eliminates Tattoos from skin that has previously undergone by other removal sessions. Magnetic Tattoo Removal technique not only erases the tattoo but also addresses any scars that may have arisen from previous alternative removal methods.

Growth

MAGNETIC

How beneficial the technique is???
Let's Evaluate the Profit

Suppose you work two days a week, and that you perform two Magnetic Tattoo Removal treatments per day.

The average treatment cost is **\$280**

| | |
|--------------------------------|----------|
| Performed treatments per day : | 2 |
| Average treatment time: | 30 min |
| Average time spend per day: | 60 min |
| Total income per day: | \$ 560 |
| Total income per week: | \$1120 |
| Total income per month: | \$ 4480 |
| Total income per year: | \$ 53760 |

Each client requires 4 sessions of **Magnetic Tattoo removal** at minimum, therefore:

$$\text{\$ } 53760 \times 4 = \text{\$ } 215000$$

Return on investment:

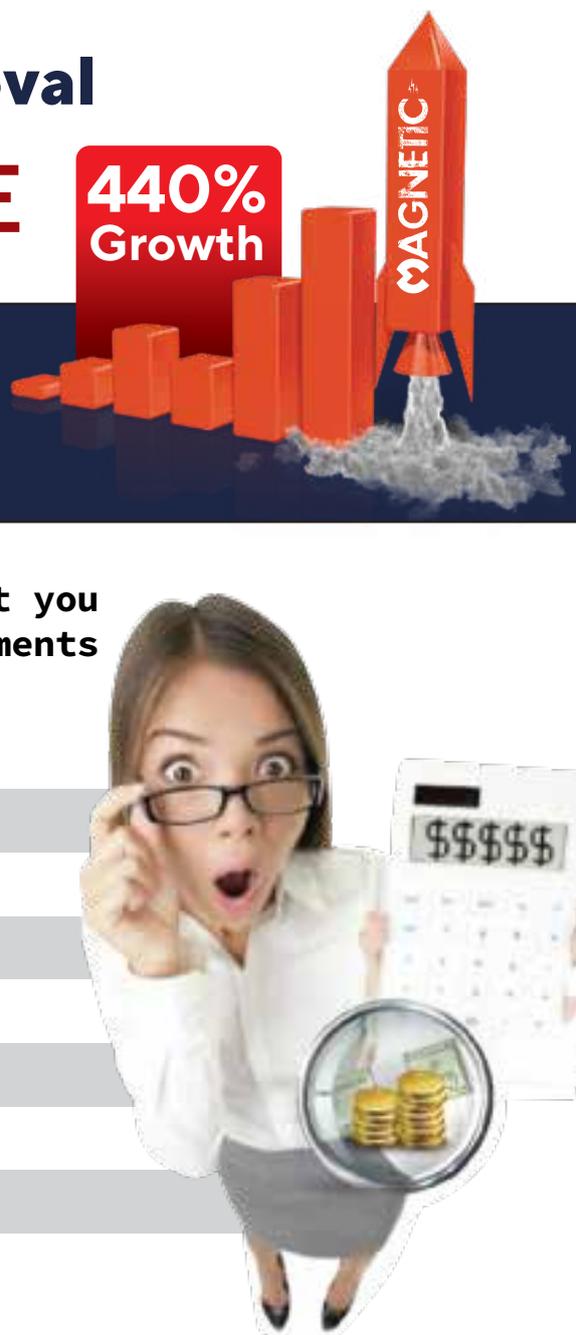

With the Magnetic Tattoo Removal technique, you'll finalize your clients because of the great results, and can even offer them a new Microblading or Micro-shading because skin keeps healthy and strong.

Each treatment cost around \$33 for consumables.

Machine and training are not consumables.

Suppose you work 2 days a week and perform 2 Magnetic Tattoo Removal Treatments a day, and your Average treatment price is \$280. Each Client requires 4 sessions of Magnetic Tattoo Removal at a minimum, Therefore

$$\text{\$ } 53760 \times 4 = \text{\$ } 215000$$
